

# COLLEGE OF ARTS & SCIENCE (AUTONOMOUS)

Attur Main Road, Ramalingapuram, Salem - 106. (Recognized under section 2(f) & 12(B) of UGC Act 1956 and Accredited by NAAC with 'A' Grade) (Co - Educational Institution | Affiliated to Periyar University, Salem ISO 9001 : 2015 Certified Institution) principal@avscollege.ac.in | www.avscollege.ac.in Ph : 98426 29322, 94427 00205.

Syllabus for

# **B. Sc BIOTECHNOLOGY**

### **CHOICE BASED CREDIT SYSTEM –**

LEARNING OUTCOMES BASED CURRICULUM FRAMEWORK

(CBCS – LOCF)

(Applicable to the Candidates admitted from 2023-24 onwards)

# VISION

• To attain excellence in the field of education by creating competent scholars with a touch of human values.

# MISSION

- To accomplish eminence in the academic domain.
- To provide updated infrastructure.
- To educate value based education.
- To impart skills through efficient training programs.
- To cultivate culture and tradition with discipline and determination.

### REGULATIONS

### **1. Eligibility for Admission:**

To get admission in a UG biotech course, an aspirant should have passed Grade XII with at least 50% in aggregate in five subjects and must have studied Physics, Biology, Mathematics shall be Eligible for admission into B.Sc., course in Biotechnology.

### 2. Duration:

The course for the degree of Bachelor of Science shall consist of three academic years divided into six semesters.

### 3. Eligibility for award of degree:

Any student who has earned his/her undergraduate degree in BSc in any specialization with a Minimum of 50% marks passed examinations.

### 4. Course of Study:

Biotechnology is a multidisciplinary field that deals with the usage of biological processes for Solving problems and making eco-friendly products. Biotechnology is a field of Biological Science and Technology, candidates are taught various subjects such as Chemistry, Biology and Information Technology.

#### 5. Scheme of Examination:

Regular class tests will be held in all subjects in the month of November.

Mid-term Examination will be held in all subjects in the month of November.

The Test Examination of Part – I candidates will be held in the month of March.

Students must appear and qualify Test/Selection Examination, failing that they would not be allowed to appear in the University Examination.

For students of the second and third year the same scheme of evolution will be followed.

#### 6. Passing Rules:

In case of a subject involving practical work a candidate must obtain 33% marks in theory and 33% marks in practical separately in addition to 33% marks in aggregate in order to qualify in that subject

#### i) Theory

Written Examination for each subject is conducted for 60 marks with duration of 3 hours. Students have to secure a minimum of 24 marks (40%) out of 60 in End Semester Examination and a total of 40(CIA+ESA) marks out of 100 marks to pass in every subject.

## ii) Practical

Practical Examination for each subject is conducted for 30 marks with duration of 3 Hours. Students have to secure a minimum of 12 marks (40%) out of 30 in End Semester Practical Examination and a total of 20(CIA+ESA) marks out of 50 marks to pass in every subject.

College of Arts & Science

Autonomous)

| Progra     | (Autonomous)   |
|------------|--|
| On suc     | cessful completion of the B. Sc Biotechnology  |
|            | Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and                                     |
| PO1        | understanding of one or more disciplines that form a part of an undergraduate                                    |
|            | Programme of study   |
|            | Communication Skills: Ability to express thoughts and ideas effectively in writing and                           |
|            | orally; Communicate with others using appropriate media; confidently share one's                                 |
| PO2        | views and express herself/himself; demonstrate the ability to listen carefully, read and                         |
|            | write analytically, and present complex information in a clear and concise manner to                             |
|            | different groups.  |
|            | Critical thinking: Capability to apply analytic thought to a body of knowledge; analyze                          |
|            | and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence;                            |
| PO4        | identify relevant assumptions or implications; formulate coherent arguments; critically                          |
|            | evaluate practices, policies and theories by following scientific approach to knowledge                          |
|            | development  |
|            | Problem solving: Capacity to extrapolate from what one has learned and apply their                               |
| PO5        | competencies to solve different kinds of non-familiar problems, rather than replicate                            |
|            | curriculum content knowledge; and apply one's learning to real life situations.                                  |
|            | Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify                    |
| PO6        | logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of                |
|            | sources; draw valid conclusions and support them with evidence and examples, and addressing                      |
|            | opposing 3 viewpoints.Research-related skills: A sense of inquiry and capability for asking relevant/appropriate |
|            | questions, problem arising, synthesizing and articulating; Ability to recognize cause-                           |
|            | and-effect relationships, define problems, formulate hypotheses, test hypotheses,                                |
| <b>PO7</b> | analyze, interpret and draw conclusions from data, establish hypotheses, predict cause-                          |
|            | and-effect relationships; ability to plan, execute and report the results of an experimenter                     |
|            | investigation  |
|            | Cooperation/Team work: Ability to work effectively and respectfully with diverse                                 |
|            | teams; facilitate cooperative or coordinated effort on the part of a group, and act                              |
| PO8        | together as a group or a team in the interests of a common cause and work efficiently as                         |
|            | a member of a team   |
| <b>PO9</b> | Reflective thinking: Critical sensibility to lived experiences, with self awareness and                          |
|            |  |

|      |   | 1.1 |
|------|---|-----|
|      | reflexivity of both self and society.   |     |
| PO10 | Self-directed learning: Ability to work independently, identifies appropriate resources |     |
| 1010 | required for a project, and manages a project through to completion.                    |     |

| Program   | n Specific Outcomes (PSOs)  |
|-----------|---|
| After the | e successful completion of B. Sc Biotechnology programme the students are expected to     |
|           | Disciplinary Knowledge: Understand the fundamental principles, concepts, and theories     |
| PSO1      | related to biotechnology. Also, exhibit proficiency in performing experiments in the      |
|           | laboratory.   |
|           | Critical Thinking: Analyze complex problems, evaluate information, synthesize             |
| PSO2      | information, apply theoretical concepts to practical situations, identify assumptions and |
|           | biases, make informed decisions and communicate effectively.                              |
|           | Problem Solving: Employ theoretical concepts and critical reasoning 5 ability with        |
| PSO3      | physical, mathematical and technical skills to solve problems, acquire data, analyze      |
|           | their physical significance and explore new design possibilities.                         |
|           | Analytical & Scientific Reasoning: Apply scientific methods, collect and analyze data,    |
| PSO4      | test hypotheses, evaluate evidence, apply statistical techniques and use computational    |
|           | models  |
|           | Research related skills: Formulate research questions, conduct literature reviews, design |
| PSO5      | and execute research studies, communicate research findings and collaborate in research   |
|           | projects.   |
|           | Self-directed & Lifelong Learning: Set learning goals, manage their own learning,         |
|           | reflect on their learning, adapt to new contexts, seek out new knowledge, collaborate     |
| PSO6      | with others and to continuously improve their skills and knowledge, through ongoing       |
|           | learning and professional development, and contribute to the growth and development       |
|           | of their field.   |
|           |   |

### **Programme Educational Objectives (PEOs)**

The B. Sc Biotechnology programme describes accomplishments that graduates are expected to attain within five to seven years after graduation.

|      | To impart advanced theoretical and practical knowledge in Biotechnology and allied                         |
|------|--|
| PEO1 | fields.  |
| PEO2 | To provide domain knowledge and expertise for successful career in academics, research and industry.       |
| PEO3 | To develop ethically and socially responsible professionals with leadership and<br>entrepreneurship skills |
| PEO4 | To provide skills of observations and drawing logical inferences from the scientific experiments.          |
| PEO5 | To develop a working knowledge of biotechnology product and processes.                                     |

# CREDIT DISTRIBUTION FOR 3 YEARS B. Sc BIOTECHNOLOGY PROGRAMME

|          | 3–Year UG Program                       | nme             |     |
|----------|---|-----------------|-----|
|          | Credits Distribution                    | 1               |     |
|          | Credits                                 |                 |     |
| Part I   | Tamil (3Credits)                        | 4               | 12  |

|          | Total Credits for th                    | ne UG Programme | 140 |

# CONSOLIDATED SEMESTER WISE AND COMPONENT WISE CREDIT DISTRIBUTION FOR 3 YEARS B. SC BIOTECHNOLOGY PROGRAMME

| Parts    | Sem I | Sem II | Sem III | Sem IV | Sem V | Sem VI | Total Credits |
|----------|-------|--------|---------|--------|-------|--------|---------------|
| Part I   | 3     | 3      | 3       | 3      | -     | -      | 12            |
| Part II  | 3     | 3      | 3       | 3      | -     | -      | 12            |
| Part III | 13    | 13     | 13      | 13     | 22    | 18     | 92            |
| Part IV  | 4     | 4      | 3       | 6      | 4     | 2      | 23            |
| Part V   | -     | -      | -       | -      | -     | 1      | 1             |
| Total    | 23    | 23     | 22      | 25     | 26    | 21     | 140           |

\*Part I, II and Part III components will be separately taken into account for CGPA calculation and classification for the under graduate programmes and the other components IV and V have to completed during the duration of the programmes as per the norms, to be eligible for obtaining the UG degree.

### **METHOD OF EVALUATION**

| Evaluation          | Marks   |          |          |
|---------------------|---|----------|----------|
|                     | Continuous Internal Assessment Test   | 15       |          |
|                     | Assignments   | 3        |          |
|                     | Class Participation   | 2        |          |
| Internal Evaluation | Distribution of marks for Attendance (in percentage)<br>96 – 100: 5 Marks<br>91 – 95: 4 Marks<br>86 – 90: 3 Marks<br>81 – 85: 2 Marks | 5        | 25 Marks |
| External Evaluation |   | 75 Marks |          |
| Total               | 100 Marks   |          |          |

**Note:** 1.UG Programmes- A candidate must score minimum 10 marks in Internal and 30 marks in External Evaluation.

2. PG Programmes- A candidate must score minimum 13 marks in Internal and 38 marks in External Evaluation.

# CONTINUOUS INTERNAL ASSESSMENT

Categorizing Outcome Assessment Levels Using Bloom's Taxonomy

| level | <b>Cognitive Domain</b> | Description  |
|-------|-------------------------|--|
| K1    | Remember                | It is the ability to remember the previously learned concepts or ideas.            |
| K2    | Understand              | The learner explains concepts or ideas.  |
| K3    | Apply                   | The learner uses existing knowledge in new contexts.                               |
| K4    | Analyze                 | The learner is expected to draw relations among ideas and to compare and contrast. |
| K5    | Evaluate                | The learner makes judgments based on sound analysis.                               |
| K6    | Create                  | The learner creates something unique or original.                                  |

# Question Paper Blue Print for Continuous Internal Assessment- I& II

| Duration: 2 Hours Maximum: 50 marks |      |     |    |    |    |          |             |
|-------------------------------------|------|-----|----|----|----|----------|-------------|
| Section                             | K le | vel |    |    |    |          |             |
| cuon                                | K1   | K2  | К3 | K4 | K5 | K6       | Marks       |
| A (no choice)                       | 10   |     |    |    |    |          | 10 X 1 =10  |
| B (no choice)                       |      | 1   | 1  |    |    |          | 2 X 5 =10   |
| C (either or choice)                |      |     |    | 3  |    |          | 3 x 10 = 30 |
| Total                               |      |     |    |    |    | 50 marks |             |

Note: K4 and K5 levels will be assessed in the Model Examination whereas K5 and K6 Levels will be assessed in the End Semester Examinations.

# <u>SECTION – A (15 X 1 = 15 Marks)</u>

ANSWER ALL THE QUESTIONS

 $\underline{SECTION - B (2 X 5 = 10 Marks)}$ 

ANSWER ANY TWO QUESTIONS

# <u>SECTION - C (5 X 10 = 50 Marks)</u>

ANSWER ALL THE QUESTIONS (Either or Choice)

College of

# Question Paper Blue Print for Model Practical Examination & End Semester <u>Examination (Practical)</u>

| Time: 3 Hours   | Total Marks: 60 Marks Minin | mum Pass: 24 Marks |
|-----------------|-----------------------------|--------------------|
| Practical Marks | Maximum Mark                | Minimum Mark       |
| Internal        | 40                          | 16                 |
| External        | 60                          | 24                 |
| Total           | 100                         | 40                 |

# **Evaluation for End Semester Examinations (Practical)**

| Record                 | 10 marks |
|------------------------|----------|
| Formula with expansion | 05 marks |
| Observation with data  | 20 marks |
| Viva-voce              | 05 marks |
| Calculation            | 15 marks |
| Result with units      | 05 marks |
| TOTAL                  | 60 MARKS |

\*Submission of record with due certification is a must for external practical examinations.

\*\*A student should complete all requires experiments to get 10 marks for the record.

# Third Year – Semester - VI

**Remarks:** English Soft Skill Two Hours will be handled by English Teachers (4+2 = 6 hours for English).

**\*\*Ins. Hrs** – Instructional Hours, CIA- Continuous Internal Assessment, ESE- End Semester Examination

 Semester: I
 Course Code: 23UBTCT01
 Hours/Week: 4
 Credit: 4

### COURSE TITLE: CORE I - CELL AND DEVELOPMENTAL BIOLOGY

#### **Course Overview:**

- This subject focuses on gene structure, function and regulation which form the molecular basis of many important biological phenomena such as short-
- 2. term organism and cellular responses to rapid changes in environmental conditions and long-term controls of development
- 3. The course introduces molecular mechanisms that underlie the organization, division, and growth of individual cells
- 4. To introduce some of the major ideas and current experimental approaches in cell and developmental biology

### Learning Objectives:

- 1. Have an sight of the cell as the fundamental unit of life and to compare the structure of the Eukaryotic cell with the primitive prokaryotic cell
- 2. Analyze the structure and obtain a strong foundation about the functional aspects of cell organelles and cell membrane.
- Study the structure and functions of Nucleic acid and discuss the molecular mechanism of Replication, Transcription and Translation and post translation all modifications of proteins.
- 4. Predict there response of cells to the intra and extracellular environment by studying about the intracellular signaling pathways.
- 5. Understand the principles and molecular mechanisms involved in cellular differentiation, morphogenesis, growth and Potency of the cell.

| Unit - I | Discovery and diversity of cells | 09 Hours |
|----------|----------------------------------|----------|
|          |                                  |          |

Cell theory - Structure of prokaryotic (bacteria) and eukaryotic cells (plant and animal cells).

| Unit - II | Structure and Functions of Cell Organelles | <b>09 Hours</b> |  |
|-----------|--|-----------------|--|
|-----------|--|-----------------|--|

Cell wall - Cell membrane - Cytoplasm - Nucleus - chromosomes - Endoplasmic reticulum -Ribosome's – Golgi bodies –Vacuoles – Lysosomes – Mitochondria – Micro bodies - Flagella -Cilia - Centro some and Centrioles - Cytoskeleton.

College of Arts & Science

| Unit - III |  |
|------------|--|
|------------|--|

Cell cycle

**09 Hours** 

Cell cycle checkpoints - Cell division - Mitosis and Meiosis - Cellular differentiation - Cell junctions - Cell Adhesion - Extracellular Matrix – Cell to cell communications-Signal transduction - G - Protein Coupled Receptors Signal transduction pathways.

Unit - IV Specialized cells 09 Hours

Motile cells(Amoeboid, Ciliary, Flagellar Movements, Nerve cells and Nerve impulse

conduction, Muscle cells and Muscle contraction, Plant cells (Parenchyma cells, Xylem and Phloem Cells)

| Unit - V | Gametogenesis | 09 Hours |  |
|----------|---------------|----------|--|
|----------|---------------|----------|--|

Spermatogenesis and Oogenesis in mammals. Fertilization - Types of cleavage ,blastula formation, gastrulation and formation of germlayers in animals - Organogenesis

| 1.        | To study  | the structure and function of biolo | ogically important molecu  | ıles      |
| 2.        | To giving | you a range of theoretical knowl    | edge and practical lab ski | lls       |

<sup>3.</sup> To covers DNA, RNA and proteins and the molecular events that govern cell function

4. To exploring the relevant aspects of biochemistry, genetics and cell biology

### Learning Objectives:

- Know about basics structure of DNA and RNA, and Organization of genes in prokaryotes & Eukaryotes. Gain knowledge about replication in Prokaryotes & Eukaryotes and role of enzymes in replication
- 2. Understand the gene expression by Translation and Transcription process and regulation of gene expression.
- 3. Know about the Mutation, their types and repair mechanism
- 4. Understand the Genetics exchanges in microbes
- 5. Understand the molecular biologist studies how molecules interact with one another in living organisms to perform the functions of life.

| Unit - I | DNA and RNA | 09 Hours |
|----------|-------------|----------|
|          |             |          |

DNA and RNA as genetic material, Characters of a genetic material, Chemistry &

Molecular structure of DNA, Topology of DNA, Structure and types of RNA. Bacterial,

Chromosome. Organization of genes in prokaryotes

| Unit - II  | Unit - II Replication of DNA |  |  |  |  |
|--|------------------------------|--|--|--|--|
| Replication in prokaryotes – Mechanism & enzymology of replication – Theta replication |                              |  |  |  |  |

&Rolling circle replication. Replication in prokaryotes - Mechanism & enzymology

| Unit - IIITranscription in prokaryotes09 Hours |
|--|
|--|

Transcription in prokaryotes, Post transcriptional modifications – Genetic code – Translation of Proteins, Post translational modifications. Regulation of gene expression in prokaryotes – Operon & concept – lac trp Operon, Transcription in prokaryotes, Post transcriptional modifications. – Genetic code.

| Unit - IV | Mutation | 09 Hours |
|-----------|----------|----------|
|-----------|----------|----------|

Mutation - spontaneous and induced Mutagen & Mutagenesis - DNA repair mechanism

| Unit - V | Genetic exchange | 09 Hours |
|----------|------------------|----------|
|----------|------------------|----------|

Genetic exchange – Transduction (specialized & generalized), Transformation, Conjugation - Hfr mapping, genetic recombination.

 ${\bf S}$  - Strong,  ${\bf M}-{\bf Medium},\,{\bf L}-{\bf Low}$ 

| Semester: I   | Course Code: 23UBTDE01 | Hours/Week: 4 | Credit: 3 |  |  |  |  |
|---|------------------------|---------------|-----------|--|--|--|--|
| COURSE TITLE: ELECTIVE DICIPLINE I - BIOLOGICAL CHEMISTRY |                        |               |           |  |  |  |  |

### **Course Overview:**

- 1. This course examines the chemical and physical properties of the cell and its building blocks
- 2. To special emphasis on the structures of proteins and principles of catalysis
- 3. The chemistry of organic / inorganic cofactors required for chemical transformations within the cell.
- 4. This course introduces the chemistry important to biological processes

### **Learning Objectives:**

- 1. Comprehend the importance of Chemistry and Biochemistry through the concept of acids and bases, and chemical bonding.
- 2. Demonstrates the formation of different types of solutions, concentrations of solutions and preparation of buffer solutions
- Recall the Structure, Classification, Chemistry and Properties of Carbohydrates and Explain Various Biochemical Cycles involved in Carbohydrate Metabolism.
- 4. Recall the Structure, Classification, Chemistry and Properties of Lipids, Nucleic acid and Explain Various Biochemical Cycles involved in Fatty acid and Nucleic acid Metabolism.
- 5. Understand the Structure, Classification, Chemistry and Properties of proteins amino acids and Identify and explain nutrients in foods and the specific functions in maintaining health.

### College of Arts & Science Unit - I **Atoms & Molecules 09 Hours** Atomic theory, formation of molecules, electronic configuration of atoms - s & p shapes of atomic Orbitals. Periodic table, periodic classification, valency. Types of chemical bonds. Classification of organic compounds -. Hybridization in methane, ethane, acetylene, and benzene Unit - II **09 Hours** Acids & Bases Acids & Bases properties and differences, Concepts of acids and bases - Arrhenius, Lowry -Bronsted and Lewis. Concentration of solution, ways of expressing concentrations of solutions – Percent by weight, normality, molarity, molality, molefraction. pH of solution, pH scale, Measurement of pH. Buffer solutions, properties of buffers, Henderson - Hassel belch equation, Mechanism of buffering action of acidic buffer and basic buffer. **09 Hours** Unit - III **Classification of carbohydrates** Properties of carbohydrates. Metabolism of Carbohydrates – Glycogenesis, Glycogenolysis, Glycolysis, Gluconeogenesis TCA cycle, bioenergetics of carbohydrate metabolism Unit - IV **Classification of Lipids. 09 Hours** Characteristics, Properties and Biological importance of lipids. Metabolism of Fatty acids, Phospholipids, cholesterol. B-oxidation of fatty acids. Unit - V Classification and structure of amino acids **09 Hours** Structural conformation of proteins. Classification of proteins. Properties and biological Importance of amino acids and proteins. Degradation of Amino acids and Urea Cycle. Vitamins (Biological functions, daily requirements, deficiency symptoms and diseases - Structure not

# Required) and Hormones.

S - Strong, M – Medium, L – Low

College of Arts & Science

| Semester: I | Course Code: 23UBTCP01       | Hours/Week: 4 | Credit: 3 |
|-------------|------------------------------|---------------|-----------|
| COURSE TIT  | TLE: CORE PRACTICAL - I CH   |               | NTAL      |
|             | <b>BIOLOGY AND BIOLOGICA</b> | LCHEMISIKY    |           |

#### **Course Overview:**

- 1. This is a relatively new discipline that has emerged from studies in physiology and biochemistry
- 2. Some cell and developmental biologists concentrate on the role that one particular molecule plays within cells.
- 3. Others study the way in which molecules assemble into structures such as chromosomes or nuclei.
- 4. Modern cell biology is a dynamic discipline that combines the interests and techniques of many scientific fields.

#### **Learning Objectives:**

- 1. Demonstrate the operation of Light Microscope Identify blood cells and its components
- 2. Isolate and identify plant, and animal cells. Summarizes the concept of gametes
  - Perform and estimate the amount of chemical substance present in a solution
- 3. qualitatively. To analyze and detect the nature of various organic class of compounds qualitatively

Qualitatively analyze the carbohydrates and amino acids and report thetype of

4. carbohydrate based on specific tests. Differentiate the carbohydrates based microscopic examination of the crystal.

Understand the methods of acidimetric, alkalimeter and permanganometry.

Quantify Ascorbic acid in lemon by Dichlorophenol indo phenol dye method,Glycine by sorensons formal titration method.

Estimate Glucose, Cholesterol and Proteins.

| Unit - I | Cell and Molecular Biology | 09 Hours |
|----------|----------------------------|----------|
|----------|----------------------------|----------|

Blood smear preparation and Identification of Blood cells

Components of a Compound / Light Microscope.

Buccal smear preparation and Identification of squamous epithelial cells

| Unit - II | <b>Developmental Biology</b> | 09 Hours |
|-----------|------------------------------|----------|
|-----------|------------------------------|----------|

Isolation and Identification of plant cells and animal cells

Observation of sperm & Egg

Mounting of chick Embryo - 24 hrs, 48 hrs, 72 hrs, 96 hrs.

Cell fractionation and Identification of cell organelles (Demo)

Functional group tests (Carboxylicacid, Benzoic acid, phthalicacid), Phenol, Urea,

Benzaldehyde, Aniline (Aniline not to be given for exam) Detection of elements (N, Halogens)

| Unit - IV | <b>Biological Chemistry - Qualitative Analysis</b> | 09 Hours |
|-----------|--|----------|
|           |  |          |

Qualitative analysis of carbohydrates - Glucose, Fructose, Lactose, maltose, sucrose, starch.

Qualitative analysis of aminoacids - Tyrosine, Tryptophan, Arginine, Proline and Cysteine, Histidine.

| Unit - VColorimetric Analysis09 Hou | 'S |
|-------------------------------------|----|
|-------------------------------------|----|

Estimation of glucose - Ortho touluidine method

Estimation of Cholesterol- Zak's method

Estimation of proteins-Lowry"smethod

| <b>COURSE TITLE</b> | : SKILL ENHANCEMENT (F | OUNDATION COURS | E) MUSHROOM |
|                     | CULTIVATION TEC        | CHNOLOGY        |             |

### **Course Overview:**

- 1. To make the learners self-reliant to identify several kind of mushrooms
- 2. To provide detailed hands on training on mushroom cultivation, packaging and marketing.
- 3. To develop a business plan on mushroom cultivation.
- 4. To help the learners to practice a means of self employment and income generation.

### Learning Objectives:

- Students can start small scale industry of Mushroom cultivation- Students study the morphology and type's of Mushrooms. They are aware of the identification of edible and poisonous Mushrooms
- 2. Learned the prospects and scope of mushroom cultivation in small scale industry.
- 3. Learned the lifecycle of the Agaricusspecies
- 4. Students will be able produces pawn on their own.
- 5. Studied the technique of Mushroom cultivation. Understood the Diseases. Post harvesting techniques of Mushrooms.

| Unit - I Introduction | 09 Hours |
|-----------------------|----------|
|-----------------------|----------|

Morphology, Types of Mushroom, identification of edible and poisonous mushroom, Nutritive Values, life cycle of mushrooms.

| Unit - II         | nit - II Spawn production                        |  |          |     |  | 09 Hours |  |

|           | -                    | s Eugenics, Euthenics and Euthenics and Euthernetics.                | henics and in depth K      | Knowledge on            |
| Unit -    | I                    | Mendel's exp   | eriments                   | 09 Hours                |

Multiple alleles in Drosophila and Blood group inheritance in man

| Unit - II | Linkage | 09 Hours |  |
|-----------|---------|----------|--|
|-----------|---------|----------|--|

Linkage - linkage in Drosophila - Morgan's experiments, factors affecting linkage. Crossing over -

Types, mechanism, significance of crossing over. Mapping of Chromosomes, interference and

Coincidence. Cytoplasm inheritance – Linked Inheritance and Sex-Determination in Man.

| Unit - III | Gene | <b>09 Hours</b> |  |
|------------|------|-----------------|--|
|            |      |                 |  |

Fine structure of the gene and gene concept, Operon Concept. Identification of the DNA as the

Genetic material- Griffith experiments, Avery, Mc Leod, Mc Carty and Hershey Chase experiment.

| Unit - IV | Mutation | 09 Hours |  |
|-----------|----------|----------|--|
|           |          |          |  |

Mutation - types of mutation, mutagens, DNA damage and Repair Mechanism. Chromosomal

Aberrations - Numerical and Structural, Pedigree Analysis-Mendel an inheritance in human. (Cystic Fibrosis, Muscular Dystrophy).

| Unit - V | <b>Population Genetics</b> | 09 Hours |
|----------|----------------------------|----------|
|          |                            |          |

Population Genetics – Hardy Weinberg principle, gene frequency, genotype frequency and factors Affecting gene frequency. Eugenics and Euthenics.

### **COURSE TITLE: CORE IV- HUMAN PHYSIOLOGY**

#### **Course Overview:**

- 1. To provide students with an understanding of the function, regulation and integration of human body organ systems.
- 2. To emphasis is placed on homeostatic maintenance in health as well as in some disease processes.
- 3. To provides knowledge about both animal and plant physiology.
- 4. To understanding how each one works when healthy and when sick, scientists can understand how to treat illness

### **Learning Objectives:**

- 1. Illustrate about digestive secretions and absorptive mechanisms
- 2. Comprehend the process of gaseous exchange in tissues and lungs
- 3. Obtain an insight about muscle physiology and cardio vascular system
- 4. Understand urine formation and physiology of reproductive system
- 5. Get an idea about neuron structure and sensory physiology

| Unit - I Digestive System | 09 Hours |
|---------------------------|----------|
|---------------------------|----------|

Overview of the digestive system, secretions of digestive tract, digestive hormones, process of Digestion, absorption, assimilation of carbohydrates, proteins, fats, nucleic acids. Absorption of vitamins, minerals and water

| Unit - II | <b>Respiratory System</b> | 09 Hours |  |
|-----------|---------------------------|----------|--|
|-----------|---------------------------|----------|--|

Overview of the respiratory system, pulmonary ventilation, alveolar ventilation, composition and partial pressure of inspired air, alveolar air and expired air, exchange and transport of Respiratory gases

| Unit - III  | Muscle physiology and Cardiovascular System | 09 Hours |  |
|---|---|----------|--|
| Overview of muscle tissue, contraction and relaxation of skeletal muscle, cardiac muscle tissue |   |          |  |

and Cardiac conduction system, cardiac cycle, cardiac output, blood pressure and human Skeletal system, skeletal divisions and functions of skeleton

# Unit - IVExcretory System & Reproductive System09 Hours

Overview of renal system, Renal physiology:- glomerular filtration, tubular reabsorption and Secretion, production of dilute and concentrated urine. Overview of male and female reproductive system, menstrual cycle, physiology of pregnancy fetal development), fertilization process, parturition and lactation

| Unit - V | Nervous System | 09 Hours |
|----------|----------------|----------|
|          |                |          |

Overview of nervous system, classification of nervous system, signal transmission at synapse, neuro transmitters. Special Senses: Physiology of Olfaction, Gustation, Vision, Hearing and equilibrium

S - Strong, M – Medium, L – Low

### **Course Overview:**

- 1. To undergraduate academic degree program that focuses on the study of microorganisms, including bacteria, viruses, fungi, protozoa, and other microscopic life forms.
- 2. To covers principles of microbiology and the impact these organisms have on man and the environment
- 3. To impart knowledge on basic activities, living and effects of microorganisms.
- 4. To inform students on why and how the micro biome is a new field of study

## **Learning Objectives:**

- 1. Understand the classification of Microorganisms and structure of bacteria
- 2. Understand the various microbiological techniques, different types of media, and techniques involved in culturing microorganisms.
- 3. Categorize the methods of sterilization and identify the significance of culture mediain the growth of different microbes.
- 4. Exhibit knowledge in analyzing the importance of Bioinsecticides, Biofertilizers prebiotics and probiotics.
- 5. Distinguish between normal flora and pathogens and describe the role of microbesin food in toxications.

| Unit - I | History of Microbiology | <b>09 Hours</b> |
|----------|-------------------------|-----------------|
|          |                         |                 |

(Biogenesis and a biogenesis, spontaneous generation), Classification of bacteria, fungi, virus, Protozoa and algae – classical and molecular approaches. Scope and applications of microbiology

- Contributions microbiology.

| Unit - II | Structure of bacteria |  |  |  |
|-----------|-----------------------|--|--|--|
|           |                       |  |  |  |

Structure of bacteria (Gram positive and Gram negative) - Bacterial growth and measurement of Growth, Media and its types staining methods (Gram's, capsule, spore, LCB mount). Methods of Preservation of microorganisms. In vitro cultivation of virus and algae.

**09 Hours** 

#### Unit - III

**Sterilization methods** 

Sterilization methods - physical and chemical methods. Definition and classification of antibiotics.

Mode of action of different groups of antibiotics – Antimicrobial resistance and its mechanism.

# MRSA, ESBL

| Unit - IV | Bio insecticides | <b>09 Hours</b> |
|-----------|------------------|-----------------|
|           |                  |                 |

Bioinsecticides - Bacillus thuringiensis, Baculoviruses - Biofertilizers - Azospirillum and blue green algae - single cell protein – prebiotics and probiotics - Dairy products (Cheese and Yoghurt). Types of microscopy – Definitions, light, dark field, phase contrast, fluorescence, and electron microscopes

| Unit - V Microbial Disease | <b>09 Hours</b> |
|----------------------------|-----------------|
|----------------------------|-----------------|

Microbial Disease- host - pathogen interaction, clinical features, lab diagnosis and treatment of Airborne disease (Pneumonia), food borne disease (Typhoid), Water borne disease (Cholera), Sexually transmitted disease (AIDS), Vector borne disease (Dengue).

College of Arts & Science

(Autonomous)

| Semester: II  | Course Code: 23UBTCP02 | Hours/Week: 4 | Credit: 3 |  |  |  |
|---|------------------------|---------------|-----------|--|--|--|
| COURSE TITLE: CORE PRACTICAL II – GENETICS AND MICROBIOLOGY |                        |               |           |  |  |  |

### **Course Overview:**

- To focuses on the application of Biotechnology and Microbiology in the functioning of genes, expression of genes, genetic variation, gene pool, structure and function of genes, and heredity of animals, plants, and human beings
- 2. To field of basic science research as microorganisms offer several features that facilitate the study of evolutionary processes
- 3. To examines the design and interpretation of experiments that have led to our current understanding of the biological roles of DNA, RNA and proteins
- 4. To covers principles of microbiology and the impact these organisms have on man and the environment

## Learning Objectives:

- Demonstrate the basic principles of important techniques in Molecular biology and Genetics. Analyze the Polytene chromosome of the organisms. Identify Barr bodies from Buccal smear
- 2. Demonstrate the Preparations and maintenance of culture medium Demonstrate Human karyo typing
- Describe the general Laboratory safety & Sterilization Techniques
   Develop Skills in Media Preparation, Isolation & Serial Dilution Techniques and Pure Culture Techniques
- 4. Microscopically analyze the morphological features of Bacteria and fungi and define various Staining Techniques. Perform the Motility of organisms
- 5. Able to characterize and identify bacteria using Biochemical tests.

| Unit - IGenetics09 I | irs |
|----------------------|-----|
|----------------------|-----|

Mitotic stages of onion (Allium cepa) root tip

Meiotic stages of cockroach testes/ Flower bud

Giant chromosomes from Chironomus larvae/ Drosophila salivary glands

Identification of Barr bodies from Buccal smear

Genetic Model Organisms (i) Arabidopsis Thaliana (ii) Caenorhabditis elegans (DEMO).

Identifications of mutants of Drosophila Human karyo typing (Demo)

| Unit - III  | Microbiology                                      | 09 Hours |  |  |  |  |  |
|---|---|----------|--|--|--|--|--|
| Sterilization techniques – Preparation of Media   |   |          |  |  |  |  |  |
| Inoculation techniques- Pour plate, spread plate and streak plate (simple, continuous, "T" streak |   |          |  |  |  |  |  |
| and quadrant streak methods)  |   |          |  |  |  |  |  |
| Isolation of bacteria from air, soil and water. Serial dilution method                            |   |          |  |  |  |  |  |
| Unit - IVTechniques09 Hours   |   |          |  |  |  |  |  |
| Staining techniques: Simple, Gram's, Capsule Spores,  |   |          |  |  |  |  |  |
| Propagation of tom  | porery mounts. I acto phonol actton blue staining |          |  |  |  |  |  |

Preparation of temporary mounts- Lacto phenol cotton blue staining

Motility test: Hanging drop technique.

| Unit - V   | <b>Biochemical characterization</b> | 09 Hours |
|------------|-------------------------------------|----------|
| D' 1 ' 1 1 |                                     |          |

Biochemical characterization - catalase, oxidase, IMVIC test and TSI.

Antibiotic sensitivity test by Kirby -Bauer method (demonstration).

Semester: IICourse Code: 23UBTSE01Hours/Week: 4Credit: 2

## COURSE TITLE: SKILL ENHANCEMENT - VERMICOMPOST TECHNOLOGY

#### **Course Overview:**

- 1. To sustainable process harnessing earthworms and microorganisms for aerobic decomposition
- 2. To nutrient-rich organic soil amendment, brimming with plant nutrients and beneficial microorganisms
- 3. To Understand the importance of vermicompost application to the soil
- 4. To provides vermicompost which is organic fertilizer and as natural manure for crops and gardens.

#### Learning Objectives:

- Vermicomposting technology broadly followed at the global level and some Indigenous methods, role of microbes in increasing the soil fertility by the action of earthworms, their advantages and limitations dealth
- 2. Understand the environmental conservation process and its importance, pollution control, biodiversity and protection of earthworms through vermiculture
- 3. To learn vermicompoting techniques
- 4. Contribute their knowledge to develop organic fertilizer with rural and urban biodegradable wastes using the Earthworms.
- 5. To understand various applications of earthworms inorganic solid waste management, soil fertility, and bioremediation.

| Unit - ITypes, Collection and Preservation of earthworms09 Hours |
|--|
|--|

Types, Collection and Preservation of earthworms - Types and basic suitable characteristics of species for vermicomposting; Role of earth worms in soil fertility, Biology of Lampito maruitti; Collection and Preservation of Earthworms; Flow sheet for vermi technology Giant chromosomes from Chironomus larvae/ Drosophila salivary glands

| Unit - IICulturing techniques of earthworms09 Hours |  |
|---|--|
|---|--|

Culturing techniques of earthworms and composting materials General method; Pot method; Wooden box method; Propagation; Factor affecting culturing of earthworm; Vermicomposting materials; Preliminary treatment of composting materials.

Small scale techniques of Vermicomposting - Indoor dual bin method; Bed method; Pit method; Heap method; Expandable worm tower assembly method; Hanging basket method; Physical, chemical and biological properties of vermicompost.

| Unit - IV   | Large scale techniques                                 | 09 Hours        |  |  |  |  |
|---|--|-----------------|--|--|--|--|
| Large scale   | techniques of Vermicomposting Outdoor dual bin; Raised | cage; Dual pit; |  |  |  |  |
| Commercial Model; Trickling filter vermicomposting; Keep it simple and save plan. |  |                 |  |  |  |  |

| Unit - V | Vermiwash and Economics | 09 Hours |
|----------|-------------------------|----------|
|----------|-------------------------|----------|

Vermiwash and Economics - Chemical composition of vermiwash; Techniques of vermiwash production: Advantages of Vermicomposting; Prospects of vermi-culture as self employment venture.

## **Text Book(s):**

|--|--|--|--|--|--|--|--|--|
| COURSE TITLE: NON MAJOR ELECTIVE COURSE - NUTRITION AND HEALTH |  |  |  |  |  |  |  |  |
| HYGIENE  |  |  |  |  |  |  |  |  |

### **Course Overview:**

- 1. Students learn about the importance of nutrition for a healthy life and health hygiene
- 2. Student know about the process of nutrition for life cycle
- 3. Understand the Improper diets and its disadvantages.

## **Learning Objectives:**

- 1. Understand the importance of nutrition for a healthy life
- 2. Study the nutrition for life cycle
- 3. Know the health care programmes of India
- 4. Learn the importance of community and personal health & hygiene Measures

| Unit - I | Nutrition | 09 Hours |
|----------|-----------|----------|
|----------|-----------|----------|

Definition, importance, Good nutrition, and mal nutrition; Balanced Diet: Basics of Meal Planning. Carbohydrates, Lipids, Proteins and Vitamins – functions, dietary sources, effects of deficiency. Macro and micro minerals – functions, effects of deficiency; food sources of Calcium, Potassium, and Sodium; food sources of Iron, Iodine, and Zinc. Importance of water – functions, sources, requirements and effects of deficiency

| Unit - IINutrition for Life Cycle09 Hours | Unit - II | Nutrition for Life Cycle | 09 Hours |
|---|-----------|--------------------------|----------|
|---|-----------|--------------------------|----------|

Balanced diet - Normal, Pregnant, lactating women, Infancy, young children Adolescents, Adults, and the Elderly; Diet Chart; Nutritive value of Indian foods.

| Unit - III Improper diets   |  | 09 Hours |  |
|---|--|----------|--|
| Definition, Identification, Signs and Symptoms - malnutrition, under - nutrition, over-nutrition, |  |          |  |
| Protein Energy Malnutrition, obesity; Nutritional Disease and Disorder - hypertension, diabetes,  |  |          |  |
| anemia, osteomalacia, cardiovascular disease  |  |          |  |

| Unit - IV | Health | <b>09 Hours</b> |
|-----------|--------|-----------------|
|-----------|--------|-----------------|

Determinants of health, Key Health Indicators, Environment health & Public health; Health -Education: Principles and Strategies. Health Policy & Health Organizations: Health Indicators and National Health Policy of Govt. of India; Functioning of various nutrition and health

organizations in India

| Unit - V | Hygiene | 09 Hours |
|----------|---------|----------|
|----------|---------|----------|

Definition; Personal, Community, Medical and Culinary hygiene; WASH (Water, Sanitation and Hygiene) programme. Rural Community Health: Village health sanitation & Nutritional Community & Personal Hygiene: Environmental Sanitation and Sanitation in Public places

| Semester: III  | Course Code:23UBTCT05 | Hours/Week: 5 | Credit: 5 |  |  |
|--|-----------------------|---------------|-----------|--|--|
| COURSE TITLE. CORE V. IMMUNE SYSTEM AND IMMUNOTECHNOLOGY |                       |               |           |  |  |

### **Course Overview:**

- 1. To studies you will establish how the immune system can distinguish between healthy and damaged self and identify dangerous non-self
- 2. To protect against different types of infectious agents and how responses vary when these agents are encountered in different anatomical sites
- 3. To keeps a record of every germ (microbe) it has ever defeated so it can recognize and destroy the microbe quickly if it enters the body again
- 4. To discusses basic immunology including cellular and molecular processes that represents the human immune system

## Learning Objectives:

- 1. Explain the role of immune cells and their mechanism in body defense mechanism.
- 2. Demonstrate the antigen–antibody reactions in various immune techniques.
- 3. Gain new insights into Antigen –Antibody interactions and to demonstrate immunological techniques.
- 4. Gain knowledge of production of vaccines.
- 5. Apply the knowledge of immune associated disease, hypersensitivity reactions.

| Unit - I  | Introduction to Immunology |  |  |
|---|----------------------------|--|--|
| Introduction to Immunology - Cells involved in immune response. Primary and Secondary |                            |  |  |
| Lymphoid organs – Thymus, Bone marrow, Lymph nodes and Spleen. Hematopoiesis –        |                            |  |  |

Development of B and T lymphocytes. Types of immunity – Innate and acquired

| Unit - II           | Antigen   | 09 Hours    |
|---------------------|---|-------------|
| Antigen: Characte   | eristics and types. Antibody - Structure, Types, Properties   | and their   |
| Biological Function | on. Production of antibodies- Hybridoma technology: Appl      | ications of |
| Monoclonal antibo   | odies in biomedical research. Antigen processing and presenta | tion (MHC   |
| molecules – struct  | ure, types and functions).                                    |             |

| Unit - III        | Antigen – Antibody interactions                                 | 09 Hours      |
|-------------------|---|---------------|
| Antigen – Antibod | ly interactions- Agglutination and precipitation reactions, Imm | uno diffusion |

and Immuno electrophoresis. Principle and application of ELISA and RIA and Western and

southern blotting.

| Unit - IV  | The complement system and activation and regulation | 09 Hours |
|--|---|----------|
| The complement system and activation and regulation. Types - Classical, alternative and      |   |          |
| Lectin pathway. Biological function of complement proteins. Cytokines - Structure, types and |   |          |
| biological function  | s. Vaccines – Types, Production and application.    |          |

| Unit - V  | Hypersensitivity Reactions and Types                          |           |
|---|---|-----------|
| Major Histocompatability Complex - MHC genes, MHC in immune responsiveness, |   |           |
| and function of Cla   | ass I and Class II MHC molecules. HLA tissue typing. Auto imm | unity and |

Autoimmune disorders. Transplantation immunology.

**S** - Strong, M – Medium, L – Low

# **COURSE TITLE: CORE VI - CLINICAL BIOTECHNOLOGY**

## **Course Overview:**

- 1. To study the fusion of genetics, cell biology and many other sciences in order to further advance in medicine
- 2. To course in the medical stream for the students interested in studying living cells and organisms
- 3. To study covers almost all branches of life sciences related to body chemistry, microbiology, molecular study of living things, crop and plant improvement
- 4. To gain practical knowledge and technological expertise in cell and molecular biology

## Learning Objectives:

- 1. The major objective of the paper is to envisage thorough knowledge in genetic diseases
- 2. Offers knowledge regarding Chromosomal aberrations
- 3. Provides knowledge on genetic diseases
- 4. Provides knowledge regarding various aspects of Humangenetics
- 5. Provide knowledge regarding clinical management and clinical enzymes

| Unit - I | Classification of genetic diseases | 09 Hours |
|----------|------------------------------------|----------|
|----------|------------------------------------|----------|

Classification of genetic diseases - Chromosomal disorders - numerical disorders e.g. trisomers and monosomes, structural disorders e.g. deletions, duplications, translocations and inversions,

Chromosomal instability syndromes.

| Unit - II         | Gene controlled diseases                                      | <b>09 Hours</b> |  |
|-------------------|---|-----------------|--|
| Cana controlled d | seeses outcome and V linked disorder mitchendriel disorders I | magila V        |  |

Gene controlled diseases - autosomal and X- linked disorder, mitochondrial disorders, Fragile X Syndrome, myotonic dystrophy. Mitochondrial diseases. Microarray technology application in diseases.

| Unit - IIIHuntington's disease09 | ours |
|----------------------------------|------|
|----------------------------------|------|

Huntington's disease - sickle cell diseases, AAT (alpha-1 antitrypsin deficiency), Alzhemiers Disease, cystic fibrosis, infection of nervous system

AVS College of Arts & Science

Unit - IVClinical management09 Hours

Clinical management & metabolic manipulation – PKU, Familial hyper cholesterolemia, Rickets,

ADA, Congenital hypothyroidism

| Unit - V | Clinical Enzymes | <b>09 Hours</b> |
|----------|------------------|-----------------|
|----------|------------------|-----------------|

Enzymes as thrombolytic agents, anti inflammatory agents, Streptokinase & Asparaginase. Catalytic antibodies

S - Strong, M - Medium, L - Low

| Semester: III | Course Code: 23UBTDE03  | Hours/Week: 3 | Credit: 3 |  |  |  |
|---------------|---|---------------|-----------|--|--|--|
| COURSE TIT    | COURSE TITLE: Elective Discipline III - BIOINFORMATICS AND BIOSTATITICS |               |           |  |  |  |

## **Course Overview:**

- 1. To collaborate with researchers in the basic, medical and clinical sciences
- 2. To conduct methodological research
- 3. To collaborate with local, state or national health institutions; and to serve our institute
- 4. To provide a comprehensive approach to developing modern medicines and new agricultural products

## Learning Objectives:

- 1. Acquire knowledge about the Developments and Applications of Bioinformatics.
- 2. Gain knowledge about the importance of the bioinformatics, databases, tools and software of bioinformatics and explain different types of Biological Databases.
- 3. Understand the basics of sequence alignment, sequence analysis and Protein structure prediction method.
- 4. Demonstrate the basic methods of data collection, graph construction and sampling techniques and Calculate measures of central tendency
- 5. Correlate and analyze biological data through various statistical methods and interpret biological data via various probabilistic distribution methods.

| Unit - I | Introduction to Bioinformatics | 09 Hours |
|----------|--------------------------------|----------|
| Unit - I | Introduction to Bioinformatics | 09 Hours |

Genome, Transcriptome and Proteome, Gene prediction rules and software. Nucleic acid

Databases - Primary and Secondary Databases - Structure Database - CATH, SCOP - Data base

Searching – BLAST and FASTA, BLOSSUM.

| Unit - II  | Sequence analysis   | <b>09 Hours</b> |  |  |  |
|--|---|-----------------|--|--|--|
| Sequence analysis (Proteins and Nucleic acids), Protein Database: Comparison of Protein        |   |                 |  |  |  |
| Sequences and Dat  | abase searching – methods for protein structure prediction - Homology | 1               |  |  |  |
| Modeling of protei   | Modeling of proteins, visualization tools (RASMOL).                   |                 |  |  |  |
| Unit - III   | Unit - IIIMultiple Sequences alignment09 Hot                          |                 |  |  |  |
| Method of multiple   | e sequences alignment - Evolutionary analysis, clustering methods Phy | logenic         |  |  |  |
| Trees - Methods to   | generate phylogenetic tree- Tools for multiple sequences alignment ar | nd              |  |  |  |
| phylogenetic analysis - History of Drug Discovery, Steps in Drug design - Chemical libraries - |   |                 |  |  |  |
| Role of molecular  | docking in drug design  |                 |  |  |  |

| Unit - IV | Statistics | 09 Hours |
|-----------|------------|----------|
|-----------|------------|----------|

 $Statistics-collection, classification, tabulations \ of \ Statistical \ Data-Diagrammatic \ representation$ 

- Graphs - Sampling method and standard error. Measures of central tendency - measures of dispersion

| Unit - V | Correlations and regression. | 09 Hours |  |
|----------|------------------------------|----------|--|
|          |                              |          |  |

Probability distribution - Binomial, Negative binomial, multinomial distribution, Poisson

Distribution. Tests of significance - t tests - F tests - Chi square test. Analysis of variance -

Statistical Soft wares.

| COURSE TITLE: CORE PRACTICAL III – IMMUNOTECHNOLOGY,<br>BIOINFORMATICS AND BIOSTATISTICS |                        |               |           |  |  |

## **Course Overview:**

- 1. The program aims to utilize and understand biological databases to gather, store, retrieve, manage, analyze and integrate biological data
- 2. To prepares you to apply and develop new computational techniques in biomedical research
- 3. To the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex
- 4. To course is aimed at individuals working in immunology research who have minimal experience in bioinformatics

## Learning Objectives:

- 1. Perform blood grouping and determine blood type.
- 2. Able to count WBC and RBC.
- 3. Conduct serological diagnostic tests such as ASO, CRP, RA and Widal test.
- 4. Analyze the Biological databases, Able to perform BLAST and FASTA
- 5. Represent data into graphical form, Test the level of significance of biological data and interpret the results. Determine averages of the biological data

College of Arts & Science

(Autonomous)

| Semester: III   | Course Code:23UBTSE02 | Hours/Week: 1 | Credit: 1 |  |  |
|---|-----------------------|---------------|-----------|--|--|
| COURSE TITLE: SKILL ENHANCEMENT COURSE (SEC-4) QUALITY CONTROL IN<br>INDUSTRIES |                       |               |           |  |  |
| INDUSTRIES  |                       |               |           |  |  |

### **Course Overview:**

- 1. To involves testing units and determining if they are within the specifications for the final product
- 2. To purpose of the testing is to determine any need for corrective actions in the manufacturing process
- 3. To control helps companies meet consumer demands for better products
- 4. To focuses on two important management methodologies Lean practices and Six Sigma

## Learning Objectives:

- 1. To impart basic knowledge about quality control in pharmaceutical industry, quality control audits in industries.
- 2. Train the students on the basics of food safety and food quality.
- 3. To teach the microbial quality control in hospitals aim to impart knowledge on manufacturing operation in industries
- 4. Acquire skills to Manufacturing operations and controls
- 5. Demonstrate handling of waste and scrap disposal.

| Unit - I | Industrial quality control | 09 Hours |
|----------|----------------------------|----------|
|----------|----------------------------|----------|

Process of quality control - sterile and non - sterile preparations - raw materials, purity check,

Quality check of finished products - Pharmaceutical products and their quality control - drugs and

Vaccines. Environmental Monitoring – Pharmaceutical industry

| Unit - II | Food safety and Food Quality | <b>09 Hours</b> |  |
|-----------|------------------------------|-----------------|--|
|-----------|------------------------------|-----------------|--|

Microbiological criteria of food, food products, Monitoring of factory hygiene and sanitation,

Food Safety and Standards. Food contaminants and diseases

Sanitation of manufacturing premises, cross contamination, processing of bulk products, Packaging operations, release of finished product.

Packaging operations, release of finished product.

| Unit - V | Manufacturing operations and controls | 09 Hours |  |
|----------|---------------------------------------|----------|--|
|----------|---------------------------------------|----------|--|

Expiry date calculation, calculation of yields, production record review, and handling of waste and Scrap disposal.

| COURSE TITLE: SKILL ENHANCEMENT COURSE (SEC-5) MEDICINAL HERBS |                       |                         |  |  |  |  |  |

#### **Course Overview:**

- 1. To learn as to what constitutes a medicinal herb, how to identify one, and how different plants and plant parts are used as medicines
- 2. To learn about the type of soil that is suitable for growing herbs, the quantity and quality of water needed and other useful information
- 3. To provides the necessary background for providers to begin to incorporate herbal medicines into their practice, particularly in regards
- 4. To identify herbs accurately, how to grow them, harvest herbs, types of herbal medicines, chemical components

# Learning Objectives:

- 1. The student can analyses the importance of herbal medicine
- 2. Can learn the role of herbal medicines for health
- 3. Can explain about Tribal medicine
- 4. Can analyses the role of traditional medicine for today sheath
- 5. Can demonstrate the use of medicinal herbs to health

| Unit - I | Ethno medicine | 09 Hours |
|----------|----------------|----------|
| Unit - I | Ethno medicine | 09 Hours |

Definition, history and its scope – Inter disciplinary approaches in ethno botany – Collection of Ethnic information

| Unit - II | Importance of medicinal plants | 09 Hours |  |
|-----------|--------------------------------|----------|--|
|           |                                | ·        |  |

Role in human health care – health and balanced diet (Role of proteins, carbohydrates, lipids and vitamins).

| Unit - IIITribal medicine09 Hours |  |
|-----------------------------------|--|
|-----------------------------------|--|

Methods of disease diagnosis and treatment – Plants in folk religion – Aeglemarmelos, Ficus

benghalensis, Curcuma domestica, Cynodondactylon and Sesamumindicum

| Unit - IV   | Unit - IV Traditional knowledge                               |              |  |  |  |  |
|---|---|--------------|--|--|--|--|
| Traditional knowled   | ge and utility of some medicinal plants in Tamil Nadu Solanur | ntrilobatum, |  |  |  |  |
| Cardiospermumhalicacabum, Vitexnegundo, Adathodavasica, Azadirachtaindica, Gloriosa |   |              |  |  |  |  |
| superba, Ecliptaalba  | , Aristolochiaindica and Phyllanthus fraternus                |              |  |  |  |  |
